Personal statement

by rick

good at math especially logic part, interesting, bright future trend, computer power can solve many problems, Turing machine, imitation game is fun.

can do many magic thing, e.g. creating games, solve problem, making your own robot, can play with my imagination and make it visualable

I am good at math especially logic, I am patient and have sharp eyes, good at debugging. I have creative mind, always have some tricky ideas.

I am currently study the computer science, when I was in college, most of my classmates choose the Mechanical Engineering while me choose Computer science because I am really crazy about it

participated in Gamejam, create a advanced 2d board game using construct2 engine, named yeti likes cookie. in the first year summer vacation I create my website using php with games on it. I also had participated in a coding competition BeeHiveMinder, which was to write your own algorithm and compete with your opponents. And I won the 2nd place. 2nd year summer I learn some c++ directX 11 myself, and trying to create my own 3

teamwork skill, time management, self-motivation. I know a programmer could be very stressful so I do exercise everyday to keep myself fit. I sometimes participate in some game-relevant little course like art course and photoshop course.

modest, fast hand speed (good for typing code), sharp eyes, DIY, strong, smart, considerable, generous, kind,

I work with teammates to a client, create a liquid democracy system, client say good.

use my AI knowledge to make my own world- ruling robot, setup my company, make you proud of me.

Dos when writing your personal statement

Do use your best English and don't let spelling and grammatical errors spoil your statement.

Do show that you know your strengths and can outline your ideas clearly.

Do be enthusiastic – if you show your interest in the course, it may help you get a place.

Do expect to produce several drafts of your personal statement before being totally happy with it.

Do ask people you trust for their feedback.

Don'ts when writing your personal statement

**Don't exaggerate – if you do you may get caught out at interview when asked to elaborate
on an interesting achievement.**

Don't rely on a spellchecker as it will not pick up everything – proofread as many times as possible.

Don't leave it to the last minute – your statement will seem rushed and important information could be left out.
